

PUBLISHED DAILY & TRI-WEEKLY BY EDGAR SNOWDEN.

FRIDAY EVENING, DEC'R. 30, 1881

The remaining great of jeet the republican puriy has to achieve, that is if republicans be sincere in their expressions, is to unsectionalize the country and make it national in all its material and moral interests. But that they are not sincere is proved by the fact that the Speaker of the House of Kenresentstives, by and with the easeent of his entire party, only gave four of the fifty-three chairmanships of the standing committees of that House to men who were hailed from the South. Another glaring illustration of their instructily is afforded by the fact that with an overflowing treasury they have refused for years past to pension the few remaining soldiers and widows of soldiers of the Mexican war, for no other reason than the be that cearly all of such soldiers live in the South. These soldiers risked their lives in winning for the contary an ex ensive and valuable demain, whose espabilities have hard'y begun to be developed, and whose possibilities are immess. And yet the ration that has so profited by their blood and awent, in their age and want, denies them the mitages of a pursion from its pletboric Treasury simply because their lot was east in the South, while it gives bundreds of million to saidding Northern pension agents. This is unscationalizing the guartry, and blershring and nationalizing it with a venguance.

Some people are in dread lest the mild weather that has prevailed so far this wister beprovecative of disease t in other words that the old saving that "a green Christmas makes a fat church yard" may prove true. Of all the " was sawe" there is none more falseious then the one refered to. It is the law temperature of sinter that kills people of weak vitality, as it does the tonderest plants and flowers, and nothing is more conducive to health in this climate than mild winters. The winter of '79-8) was exceptionally mild, and its death rate comparatively low, while the severity of last winter was attended by a rate of mortality that was unumaile high.

Mr. Pheles, of Connecticut, that introduced a bill in the United States House of Representatives appropriating \$13,000 for the expenses of a commission of three colored men, who ere to visit the South and exquire into the intellectul condition of the colored people thereof, and report thereon. General Walker, who superiatended the recent cansus, is also from Connection', but Mr. Phelps evidently has a poor opinion of the value of his work.

The present arrived; of General Johnston as the gratuitous and unwarranted impogner of the personal honosty of Mr. Jefferson Davis, waich is vouched for by the history of a long life and by political and sectional enemies, is an ant illustration of the folio of live here weiship, for there was a time when General Johnston was almost worshipped in the South.

It is to be hoped that the proposed attempt to redistribute the federal pstronage so that the offices that are assigned to the South may be filled by man roslly from the South, and not by those who though hailing from there have probsbly naver in their live been farther South than Washington, may succeed. Under the policy that to the victors belong the spoils, the republicans have all the federal offices, but it would be only in accordance with that policy that Southern, and not Morthern republicans are ontitled to such offices as are allotted to the South.

The Richmond Wang says the resdjusters "always favored the abolition of the internal reverua so far as it concerns tebacco." How can this be when General Mahone voted against Mr. Bayard, who is in favor of a reduction of the tax on tobseco, for cisorman of the Finance Committee of the Senate, and for Mr. Morrill, who is opposed to such reduction.

Mr. James Liptrap, of Valley Mills, near Staupton, shot last week a large golden cagle, which measured over six feet from tip to tip of the wiegs. It was a bandsome and powerful spcoimen of the species.

The fortherming annual statistics of Richmond's industries and business will make most encouraging showing for the year just olosing. The iron business has been particularly good, and shows an increase over the year 1880 of not less than filty per cent. Rumers are in circulation in Lyachburg of

forgeries, amounting to some \$3 500, alleged to have been committed by a 'prominent citizen.' Nobody scems to know who the party is; and there is one version that the report is a mere canard. Governor Holliday ate his Christmas dinner

with his friends at home in Winchester, and will not return to Richmond until New Year's Day, when he will formally turn over the seals of the State and other executive parapheroslia to his successor. Colonel Cameron.

Correspondence of the Alexandria Gazatte. 1 RICHMOND, Va., December 29.-1t is ittimated that more than one of those aspirants would be successful, will be very much disappointed when the Legislature resseanbles. Gen, Mahone will, it is understood, remain in the city until ail the State offices are filled, and be bere longer.

Many theories are now being advanced as to the causa of the recent terrible steamboat disacter at West Point. A goutleman from there this morning states that only a short time bo fore the explosion between one and two tons of powder had been taken off the boat and put on the wharf. Had the flames boon communicated to this, not only the great wharf, but much of the town might have been destroyed. Some of the advance guard of the innumerable

army of office seekers have come in already, and there is a buzz among the office seekers for the spoils. Ray, J. William Jones, Secretary of the Southern Historical Society, is making diligen enquiries for such contributions as well throw some light upon the Johnston Davis controver-

sy, and it is very probable that in the course of two weeks the gist of the whole matter will be given to the public.

The custom of New Year's calls will be very generally observed in Richmond Monday. It is noticeable that the parties of young ladies re-caiving together will be much larger than usual; in some instances as many as twelve and lifteen

will receive at one house. Governor-sleet Cameron will go into office on Monday, although the term of Gov. Holliday will really end on Saturday. Gov. Holliday, after a brief sejourn in Winchester, will leave for an extensive tour through California and from thence to Mexico. His visit will be purely for recreation and rest after four years of what might be termed a turbulent reign in Virginia; for it is certain that the retiring Governor has had more to contend with than any of his predccassors sicce the war, for he has seen the rise and growth of a fight in his party—the party which to Walker and Kemper gave a solid support and which was as solid in opposition to Wells. The post ion of Governor of Virginia for the past four years has been no enviable one. STRONGBOW.
